

GROUNDWATER CARTOONS

The Netherlands Chapter International Association of Hydrogeologists

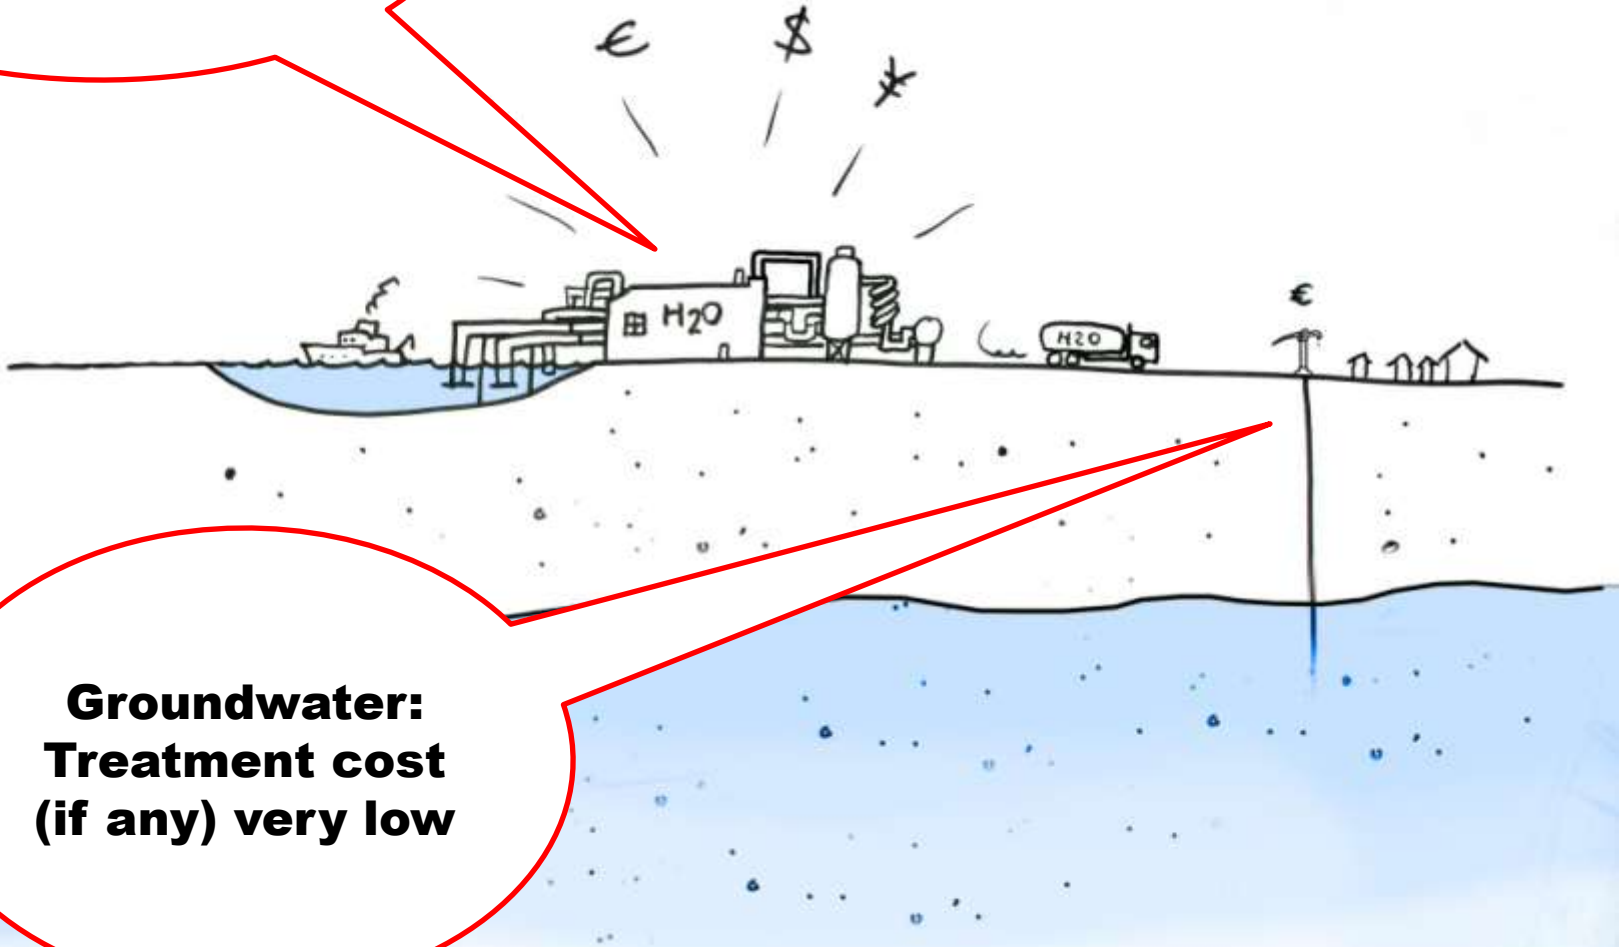

(Four examples of learning opportunity)

The Netherlands Chapter of IAH has produced a series of cartoons on groundwater that can be used freely for presentations.

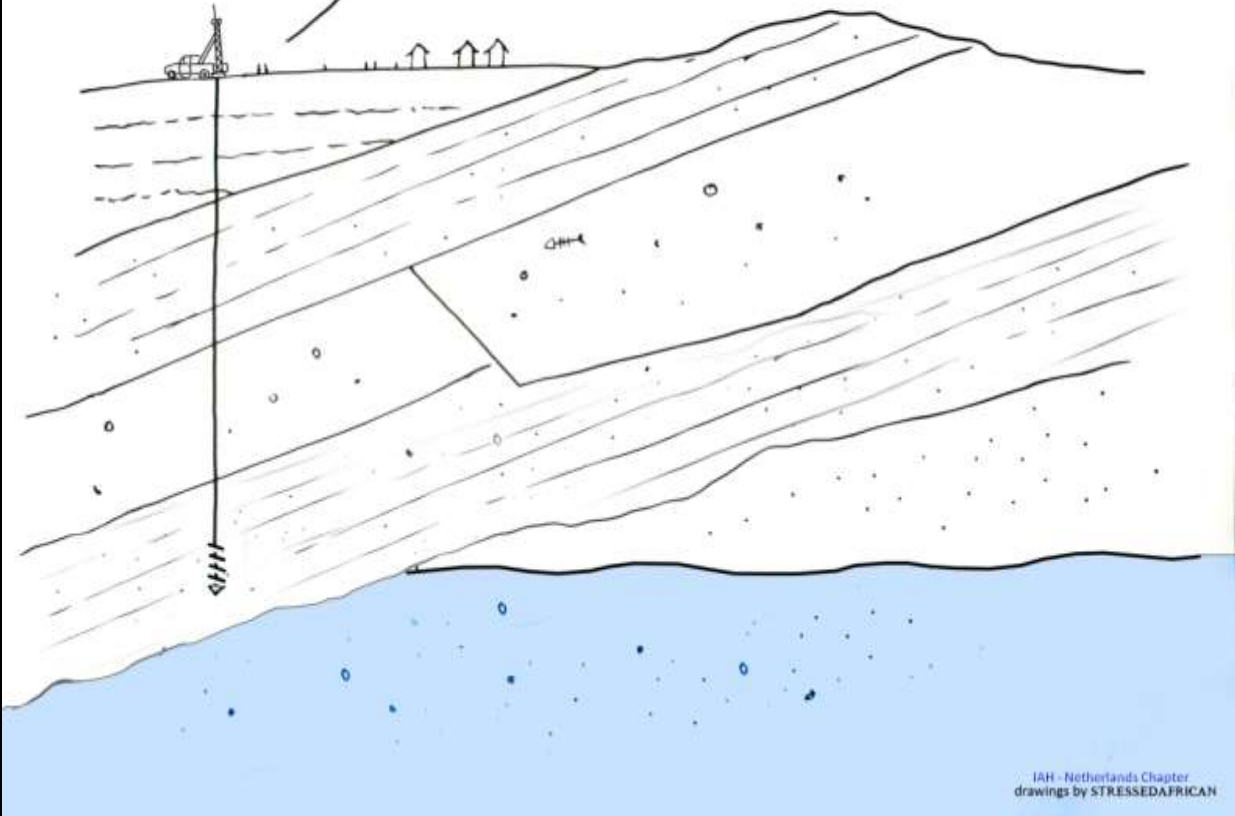

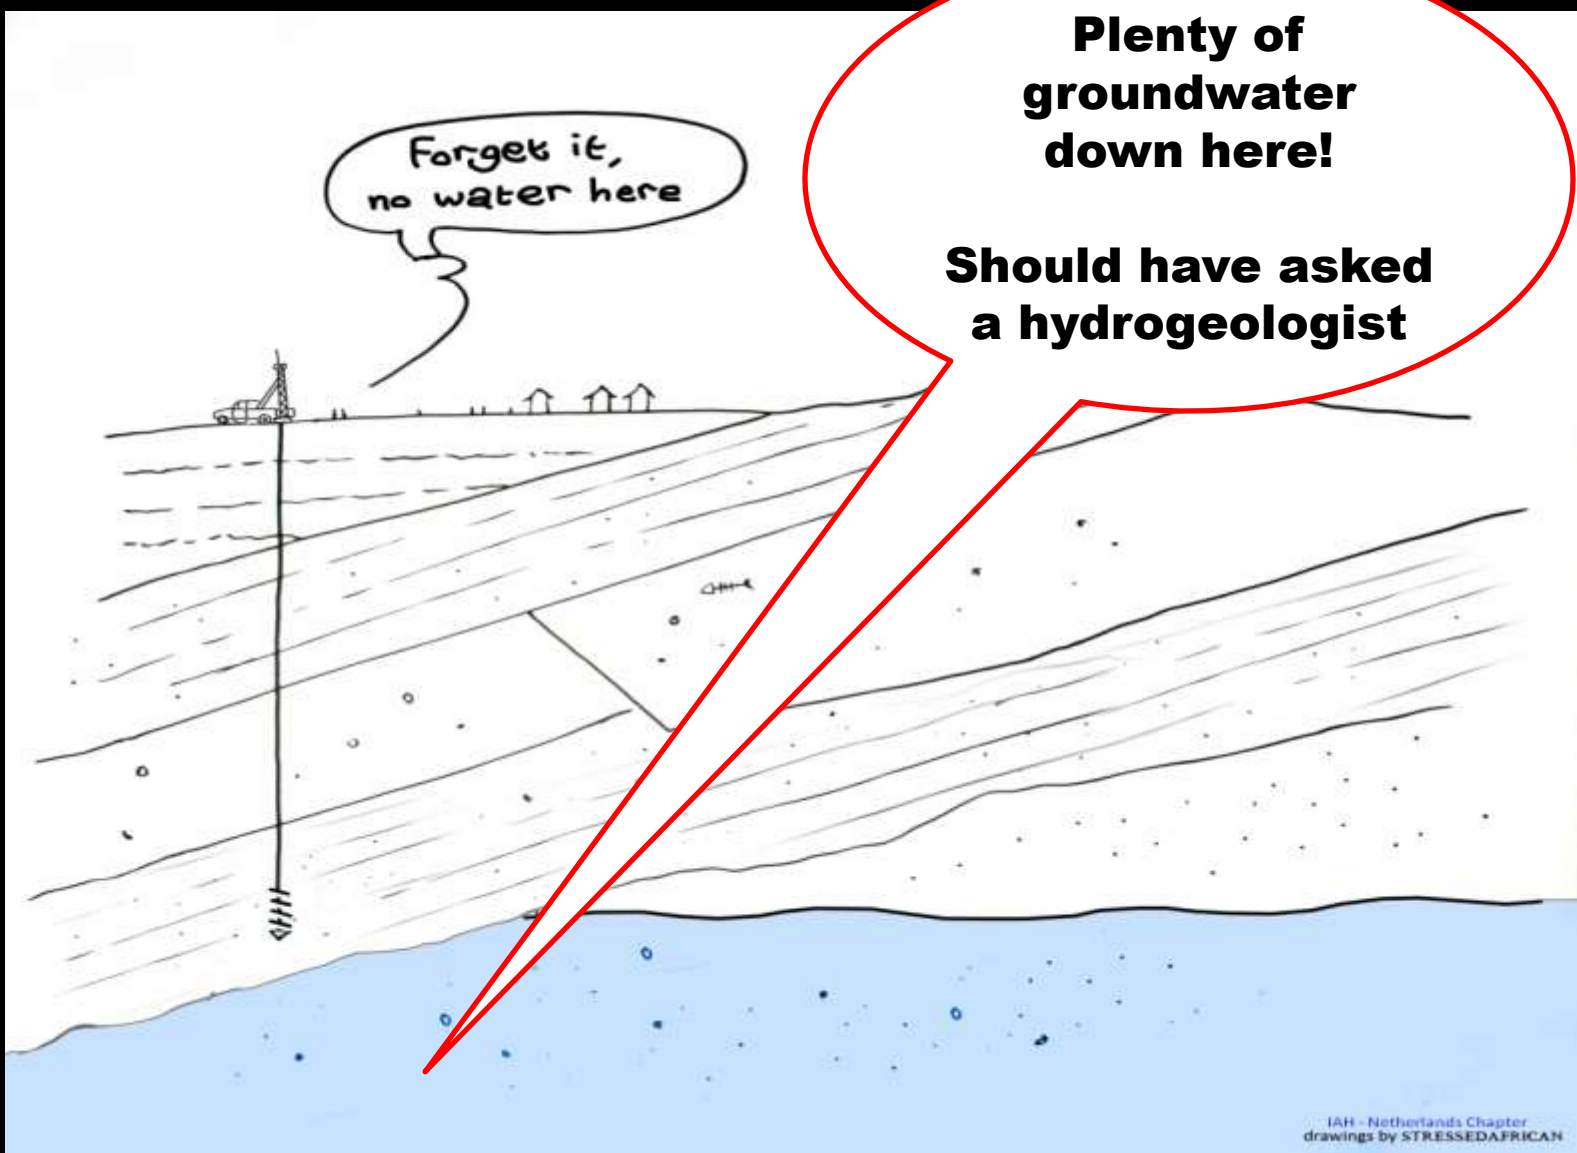

**Desalination and
surface water:
Treatment cost
high**

**Groundwater:
Treatment cost
(if any) very low**

Forget it,
no water here

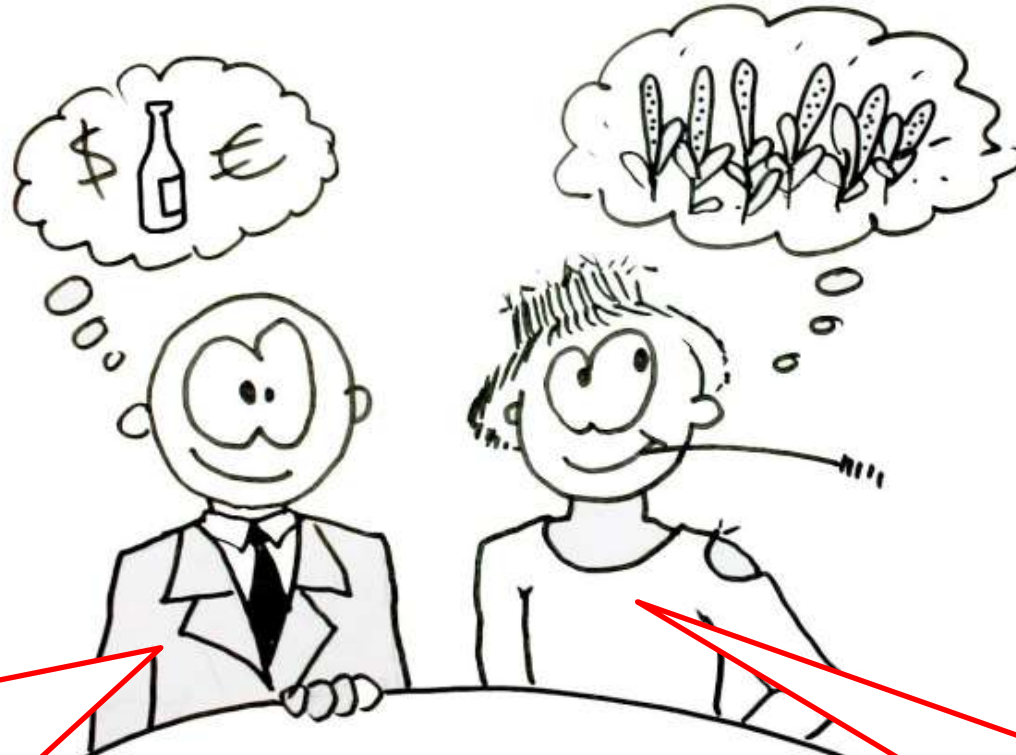

Forget it,
no water here

**Plenty of
groundwater
down here!**

**Should have asked
a hydrogeologist**

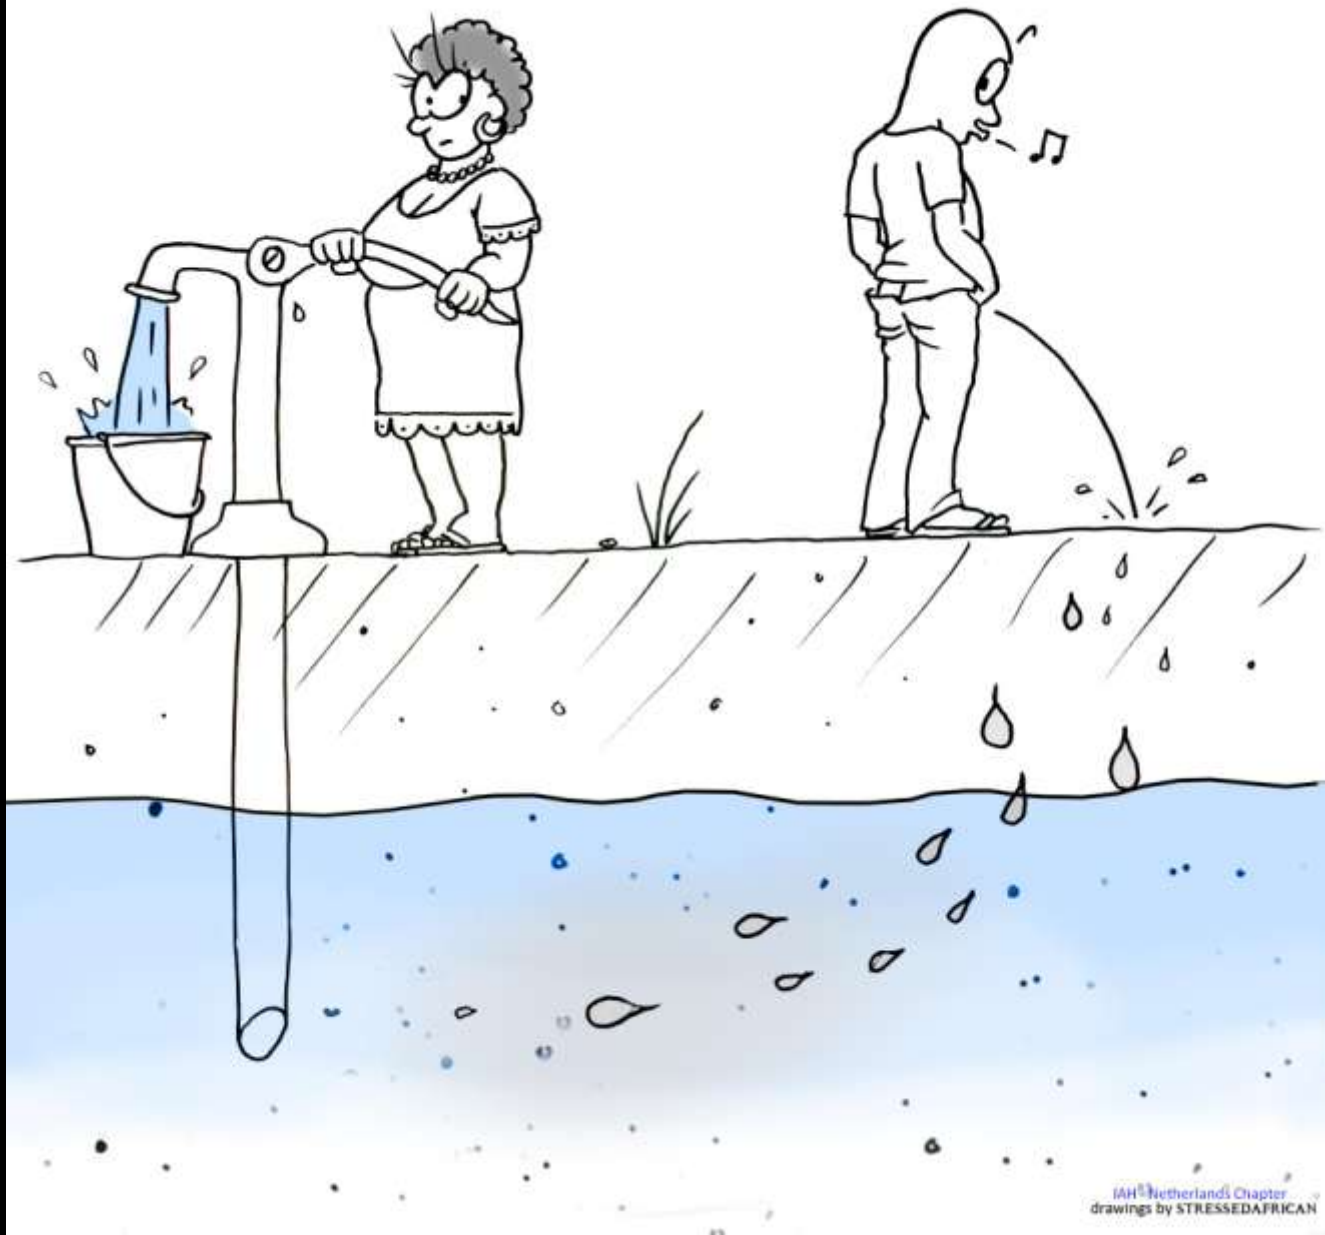

Maybe both ideas are needed to achieve benefits from groundwater resources?

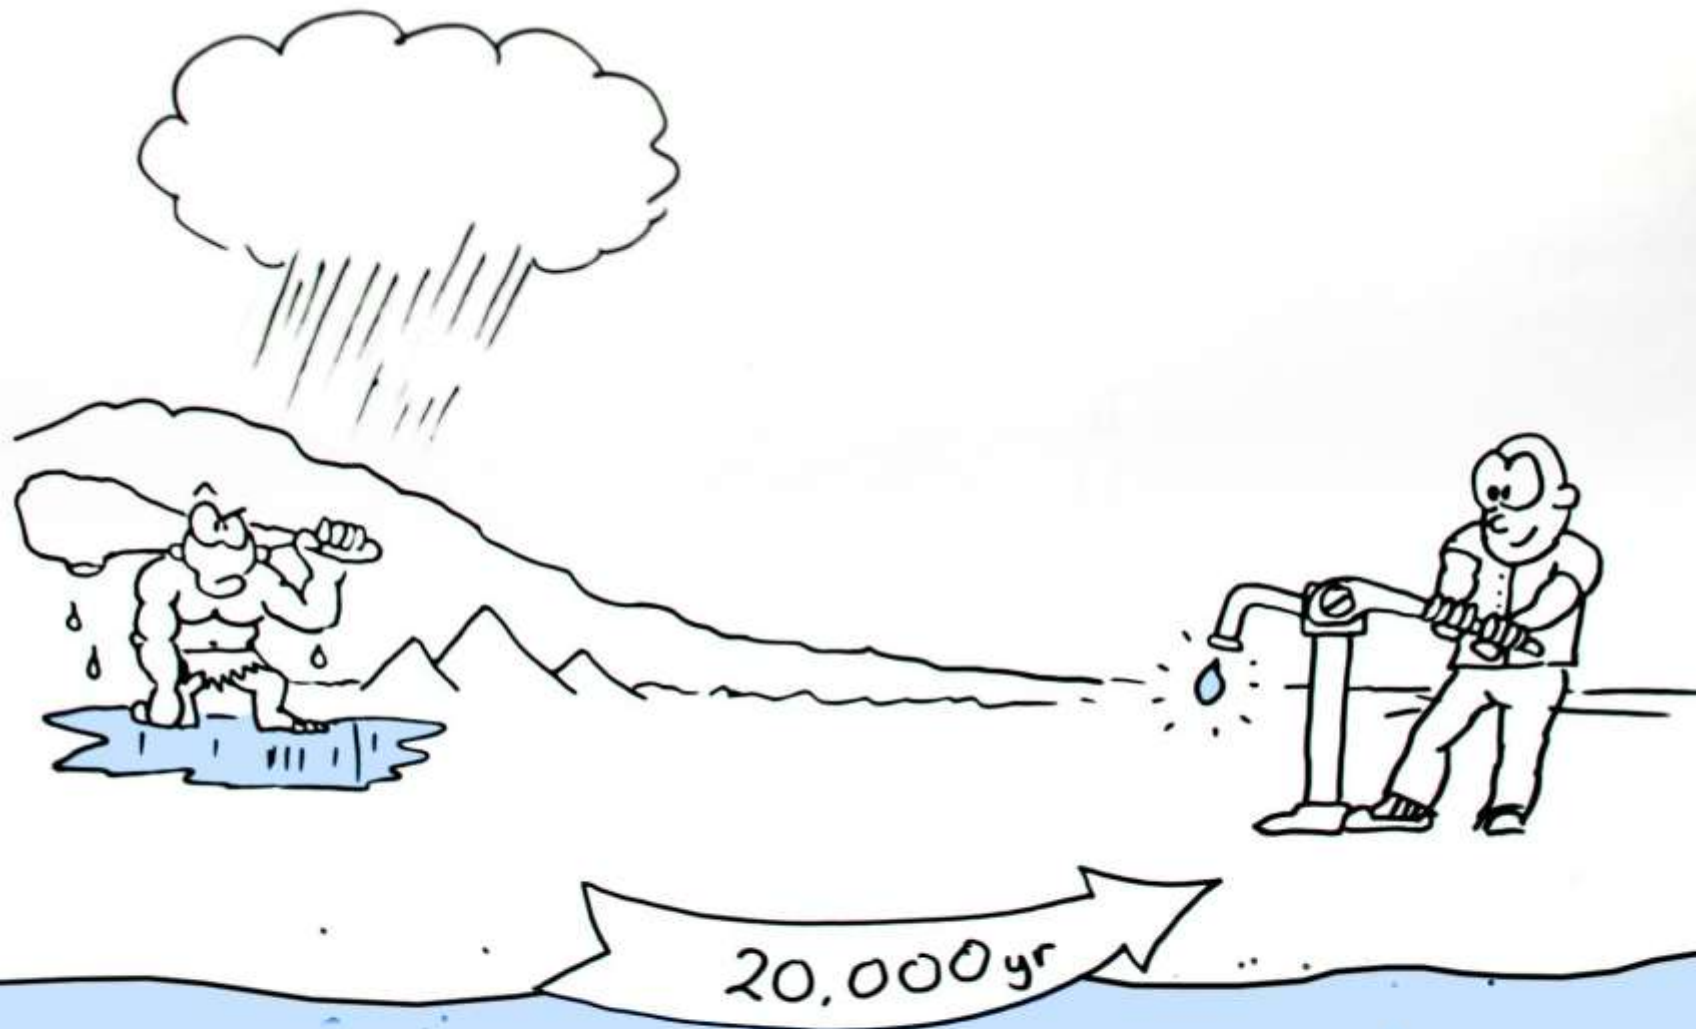

**Private
sector
profit?**

**Citizens
can benefit**

Education and behavior change need to protect resources

Hydrogeologists can tell us where our water comes from and how long it stays underground
