Association of Ground Water Agencies - American Ground Water Trust

See website for field visit opportunity to Regional Recycled Water Program (transportation not provided)

Background

The first AGWA/AGWT joint conference was held in Ontario, CA in 2000. Since then, this annual event has provided an important information exchange and networking opportunity for California's water agencies, utilities and water districts, and for all water professionals (scientific, engineering, managerial, legal, environmental, regulatory), end-users of water, and local and state elected officials involved with water policy issues. The focus of every program is on current groundwater management issues in California.

Regional Recycled Water Advanced Purification Center

POST-CONFERENCE TOUR Wednesday, Feb. 13th - Sign- up: www.agwt.org/events

9:30 am -11:30 am Joint Water Pollution Control Plant, 24501 S. Figueroa Street, Carson, 90745 Learn about the Advanced Purification Center. A new demonstration facility that tests an innovative process to purify wastewater for groundwater replenishment. It could lead to a fullscale program that purifies 150 million gpd and replenishes four groundwater basine in Southern California making it

basins in Southern California, making it one of the largest of its kind in the world. The program is a partnership of The Metropolitan Water District of Southern California and the Sanitation Districts of Los Angeles County.

11:30 - 12:00 Session 1 IDENTIFYING, QUANTIFYING AND DEALING WITH CONTAMINANTS OF EMERGING CONCERN (CECs) (Including 1,2,3-TCP, hexavalent chromium, PPCPs, PFAS, perchlorate, 1-4, dioxane, NDMA and others!) Water agencies are faced with an urgent need to respond to concerns about health issues, property values, remediation options and infrastructure costs related to the identification, measurement and treatment of these compounds. Moderator: Rick Zimmer, Senior Account Manager, Eurofins Eaton Analytical, LLC, Monrovia, CA CECs IN THE LOS ANGELES (CENTRAL/WEST) BASIN Brian Partington, Senior Hydrologist, Water Replenishment District of Southern California, Lakewood, CA CECs IN THE ORANGE COUNTY GROUNDWATER BASIN Patrick Versluis, Director of Water Quality, Orange County Water District, Fountain Valley, CA Presenter, CECs IN THE SAN GABRIEL BASIN Randy Schoellerman, Assistant Executive Director, San Gabriel Basin Water Quality Authority, West Covina, CA CECs IN THE CHINO BASIN Presenter to be determined 12:00 - 1:00 LUNCH (provided) 1:00 - 2:20 -Session 2 PASO ROBLES BASIN - FIRST JURY TRIAL OVER GROUNDWATER RIGHTS IN CALIFORNIA A Santa Clara County Superior Court jury found on Sept. 24, 2018 that a group of public water suppliers in San Luis Obispo County had the right to pump groundwater from a large groundwater basin in San Luis Obispo and Monterey Counties. The four-week trial pitted agricultural interests against public water suppliers during a time of extreme water tension due to drought and drought-like conditions in the State. What comes next? Anthony Brown, CEO & Principal Hydrologist, Aquilogic, Costa Mesa, CA Jeffrey V. Dunn, JD, Attorney, Partner, Best Best Krieger Law, Irvine, CA 2:20 - 3:50Session 3 THE CLOUD & WATER RESOURCES MANAGEMENT Moderator to be announced In the natural hydrologic system, water moves from the meteorological clouds to aquifers. In the modern management of groundwater, the movement of hydrogeological data is from the ground to the cyberspace cloud. Management is the key to groundwater sustainability. Does the "cyberspace cloud" help? NEXT GENERATION GROUNDWATER LEVEL INFORMATION SYSTEMS: EXTENDING WELL DATA NETWORKS BEYOND THE WELLFIELD TO INFORM OPERATION AND MANAGEMENT DECISIONS Chuck Dunning, PhD, PG, Vice President Business Development, Wellntel, Milwaukee, WI HELPING GSAS ACHIEVE SUSTAINABILITY USING FOCUSED GROUNDWATER MANAGEMENT SOFTWARE Aaron Collier, PG, Vice President, Collier Consulting, Stephenville, TX DEVELOPING A COMPREHENSIVE DATA MANAGEMENT SYSTEM FOR INDIAN WELLS VALLEY - PAINFUL BUT NECESSARY Tim Parker, PG, CEG, CHG, President, Parker Groundwater, Sacramento, CA 3:50 - 4:00 BREAK 4:00 - 5:30Session 4 DOWN-HOLE TECHNOLOGY FOR EFFICIENT GROUNDWATER PUMPING, RECHARGE AND WATER QUALITY CONTROL Water engineers, consultants and agency managers can benefit from technology updates about what happens down a well. Water wells are engineered holes in the ground. The equipment that is selected for pumping, recharge and for refining well design can have significant economic impacts on construction and operation costs. Drawing up specifications for wells is best done with an understanding of equipment options and awareness of how advance information of subsurface geochemistry can inform pumping and treatment decisions. CHALLENGES TO ENSURING SAFE SUSTAINABLE GROUNDWATER SUPPLY IN RURAL AREAS OF CALIFORNIA Water Supply responsibilities in California extend beyond providing for the needs of the major irrigation industries and the water agencies with large service populations. The more rural areas of the state also have sustainability and water quality issues. As more people are choosing to live in the foothills and in areas away from major urban centers and the reach of pipelines, there needs to be a closer focus on how groundwater professionals can help maintain affordable and safe water supply for small systems and

WATER AGENCY/WATER DISTRICT: COMMUNICATION, OUTREACH AND EDUCATION INITIATIVES WHY THEY ARE NEEDED AND HOW SUCCESS IS MEASURED

Why do water agencies invest in education programs? What are the benefits from having the customer base understand where their water comes from and how it is delivered? How do agency educators decide on their targets? Is "outreach" different from "education" and is there a dividing line between public relation programs and education? What initiatives are shown to be effective and how can their effectiveness be assessed? Moderator: Andrew Stone, Executive Director, American Ground Water Trust, Concord, NH
